

Waterway Mix

Features: The waterway mix features an inexpensive blend of tall fescue, timothy, perennial ryegrass, and annual ryegrass. All varieties within the blend will set a dense root system and still let water to flow over top.

Components:

Grass Specie	%
Tall Fescue	65%
Timothy	15%
Perennial Ryegrass	15%
Annual Ryegrass	5%

Tall Fescue:

- Very persistent, high cold-heat tolerance, and great root system
- New and Improved varieties used in mix

Timothy:

- High tonnage and great winter hardiness
- Used primarily for livestock forage, still good as a cover

Seeding Rate:

- 25-35 lbs/acre depending on soil type and cover desired

Perennial Ryegrass:

- Most popular cool season grass in the world
- Good tonnage and yield, great for high moisture areas with high water requirements

Annual Ryegrass:

- Winter hardy and consistent growth/stand
- Newer, more superior varieties available have improved tap roots
