CORN PRODUCTS

NEW

66P46 | 96 DAY

Available as: PCE

- Broadly adapted across the Corn Belt
- Covers lots of acres for high yield and stress tolerance both
- Offers very strong agronomics
- Great silage option for dual-purpose usage

NEW

67P33 | 97 DAY

Available as: DS

- A widely adapted hybrid that can take tougher soils
- Offers a new mode of action for CRW control
- Girthy ears with great test weight
- Great silage option for dual-purpose usage

NEW

67P84 | 97 DAY

Available as: SSProRIB

- A well-rounded product for the Northern Corn Belt
- Big performance against key products in the RM
- Solid disease package including Tar Spot
- Goes North and South of Zone on all soil types

NEW

70P47 | 100 DAY

Available as: DS

- Goes over all yield levels and has great wet feet
- Offers a new mode of action for CRW control
- Comes South of Zone well for the RM
- Well-adapted from East to West across the Corn Belt

NEW

71P11 | 101 DAY

Available as: PCE, CONV

- Strong yields from East to West across the Corn Belt
- Strong performance for grain and silage both
- Leads the pack for emergence and vigor
- Deep kernels that flex with ear length

PROVEN

71P16 | 101 DAY

Available as: SSRIB

VALUE HYBRID

- Leading 101 day product with tremendous ear girth
- Genetics and disease package to go East and West
- Flex ear can tolerate many populations
- Good response from fungicide use

PROVEN

71P50 | 101 DAY

Available as: SSPRORIB

- A mix of strong yields and agronomics both!
- Likes all yield levels and goes North and South
- Good tolerance to Crown Rot
- Great grain yields, but also a strong silage option

PROVEN

72P32 | 102 DAY

Available as: D

VALUE HYBRID

- Exciting genetics bringing CRW control at 102 day RM
- Widely adapted and takes a range of populations
- Strong disease package that goes East to West
- Goes across many soil productivity levels

CORN PRODUCTS

73F02 | 103 DAY Available as: G

- Very versatile product
- Goes on many soil types
- Solid agronomics
- Strong against many common diseases

73P40 | 103 DAY Available as: PCE

VALUE HYBRID

- Lots of good data supporting this hybrid
- Very good against Tar Spot and GLS
- Consistent ears with very high test weight
- Stays healthy and intact

PROVEN

73P67 | 103 DAY Available as: TRERIB

- An offensive type product that loves highly productive acres
- Prefers to be in-zone and North for a 103 day RM
- Responds well to fungicide and high management
- Girthy ears with big kernels and strong test weight

74P10 | 104 DAY Available as: PCE, CONV

- An interesting "tough" x "high yield" cross
- Shines right through moderate and tough yields levels
- Long, clean looking ears with deep kernels
- Takes all populations and comes South well

PROVEN

75P60 | 105 DAY Available as: TRERIB

- A widely-adapted product that can go almost anywhere!
- Pretty strong on Tar Spot and key diseases
- Likes early planting with excellent vigor
- Can go across high to low yield levels and perform well

75P72 | 105 DAY Available as: SSPRORIB

- A medium statured plant that can go on many acres
- High yield level with solid disease package
- Strong stalks that resist issues with Greensnap
- Very competitive against key checks in the RM

NEW

75P85 | 105 DAY Available as: DGV2PRIB

VALUE HYBRID

- A popular, widely-adapted hybrid that goes on many acres!
- Modified root structure with good wet feet
- Responds at all yield levels
- Can take drought stress and lower pops

76P42 | 106 DAY Available as: PCE, CONV

FEATURED PRODUCT

- A "top-shelf" type of performance for the 106 RM!
- Dominant yield results for three years!
- As well-rounded as a hybrid can come
- Comes South well for early corn and keeps the yield level

PROVEN

CORN PRODUCTS

NEW

77F02**107 DAY**

Available as: G

- Solid and dependable yields
- A robust statured hybrid with a broad disease package
- Widely adapted product that goes on any soils
- A low-risk option for any kind of acre

PROVEN

77P25**107 DAY**

Available as: VT4PRIB

VALUE HYBRID

- Claims a "sweet spot" on the yield versus moisture curve!
- Really solid on key diseases
- Favors the Eastern Corn Belt with a big, girthy ear
- Very favorable silage attributes

PROVEN

77P60**107 DAY**

Available as: SSRIB

VALUE HYBRID

- Strong yield level on productive acres
- Good Fall intactness with fast dry-down
- Prefers medium to high populations
- Multiple years of strong data behind it

PROVEN

78P30**108 DAY**

Available as: VT2PRIB

- Tested very strongly in research data
- Moderate statured and great against Greensnap
- Goes all across the Corn Belt and goes North well
- Performs well in many yield levels and soils

PROVEN

78P95**109 DAY**

Available as: PCE, CONV

- A top pick for offense and defense both!
- Stable across various yield levels
- Very strong agronomic attributes
- Can handle about any disease pressure

PROVEN

79P15**109 DAY**

Available as: V

- A big plant type with a lot of health!
- Goes all across the Corn Belt
- Strong defense against Tar Spot
- Can handle tough environments, but very capable on the top end as well

PROVEN

79P54**109 DAY**

Available as: SSPRORIB

- A great new SmartStax PRO bringing unique characteristics
- Unparalleled disease package in this RM
- Great adaptation from East to West
- Use caution when applying PGR herbicides

PROVEN

79P87**109 DAY**

Available as: SSRIB

- Brings high yield levels into the 109 RM!
- Best suited for Central and East of I-35 in Iowa
- Best positioned in the high yield environment
- Fungicide use can add more yield

CORN PRODUCTS

8015 | 110 DAY Available as: RR, CONV

PROVEN

- Very good stalks and excellent roots
- Excellent early season vigor
- Very good test weight grain on a semi-flex ear
- A true benchmark nicknamed "Mr. Consistent"!

80F02 | 110 DAY Available as: G

NEW

- A very agronomically sound product
- Takes a range of planting populations
- A big plant style that offers low risk and superior silage
- Solid against key diseases

80P75 | 110 DAY Available as: PCE, CONV

PROVEN

- A solid upgrade over key products
- Outstanding stalks and roots with lower Greensnap risk
- Goes East to West and pulls South as well
- Medium statured plant with a modified root structure

80P81 | 110 DAY Available as: SSPRORIB

NEW

- An offensive type product capable of very high yields
- Responds great to fungicide and top management
- Solid agronomics and disease package
- Big girthy ears with average test weight, a nice silage option also

80P89 | 110 DAY Available as: TRERIB

NEW

- Top ratings for test weight, stress tolerance, early roots, and tough ground!
- A solid, defensive type product that can go on every acre
- Food-grade type grain quality
- Keep populations on the higher side on productive soils

81P19 | 111 DAY Available as: VT4PRIB, TRERIB

PROVEN

- Very strong performance against key checks
- Goes well into all yields levels and goes North and South
- Responds well to a fungicide application
- Has shown good tolerance to Crown Rot

81P20 | 111 DAY Available as: PCE, CONV

PROVEN

- Big yield potential when planted in medium to high yield environments
- A very versatile hybrid to cover many acres
- Can tolerate lots of soil types and yield levels
- Girthy ears with lots of flex

81P45 | 111 DAY Available as: TRERIB

PROVEN

- An offensive type product for all soil types
- Shown solid tolerance to Crown Rot
- A tall plant type with solid agronomics
- Stays green and intact into the Fall

CORN PRODUCTS

81P65 | 111 DAY

Available as: DV, V, CONV

- Outstanding performance and versatile
- Widely adapted to many environments
- Takes a range of populations
- Excellent test weight and good on Tar Spot

82P40 | 112 DAY

Available as: SSRIB

VALUE HYBRID

- Offers high yields and strong agronomics
- Very consistent ears, push populations!
- Adapted well East to West
- Excellent on Goss's Wilt and Greensnap

82P42 | 112 DAY

Available as: PCE

- High yields no matter the season!
- Top-end yields coupled with great agronomics
- Very complete package against key leaf diseases
- Watch husk cover going East into areas known for ear molds

82P68 | 112 DAY

Available as: SSPRORIB

VALUE HYBRID

- This SmartStax® PRO RIB Complete® brings strong yields to the table!
- Long flex ears with heavy test weight
- Moves North of zone well
- Prefers more highly-managed acres

82P74 | 112 DAY

Available as: SSPRORIB

- Strong yield potential and a wide footprint
- Goes North and South of Zone on all soils
- Big kernels with strong test weight
- Strong agronomics and good tolerance to Crown Rot

82P96 | 112 DAY

Available as: PCE, CONV

FEATURED PRODUCT

- New genetics that are pushing the limits on yield!
- Dark green plant with strong disease package
- Takes a range of populations with big, wide leaves
- Strong Southern movement

8360 | 113 DAY

Available as: SSRIB, CONV

- Top-end yield potential in high yield environments
- Moves North well for full season hybrid
- Well adapted for the Central and Eastern Corn Belt
- Best performance at medium to high populations

83P33 | 113 DAY

Available as: DGV2PRIB

VALUE HYBRID

- A yield leader at the 113 RM
- Girthy ears with deep, "flexy" kernels
- Push into higher-yield environments
- Very nice disease package

CORN PRODUCTS

PROVEN

83P48

113 DAY

Available as: SSPRORIB

- Really nice yield levels combined with solid agronomics
- Strong stalks with good heat and drought tolerance
- Excellent test weight for possible food grade market
- Top notch trait package for CRW control

STALK STRENGTH	8
ROOT STRENGTH	7
OVERALL DISEASE	7.5

PROVEN

83P66

113 DAY

Available as: VT2PRIB, CONV

- A must try relative of our largest seller 8360!
- Built for high yields, but can also take stress
- Goes on all soil types
- Goes North and South with average populations

STALK STRENGTH	8
ROOT STRENGTH	8
OVERALL DISEASE	8

PROVEN

84P41

114 DAY

Available as: PCE

- Adapted to all directions in the Midwest
- Top-end yield potential with strong performance in tougher soils also
- Fantastic disease tolerances with nice grain quality
- More of a shallow, fibrous type root system-avoid pure sand acres

STALK STRENGTH	8
ROOT STRENGTH	7
OVERALL DISEASE	7.5

PROVEN

84P78

114 DAY

Available as: TRERIB, CONV

- A big time hybrid to cover lots of acres!
- Can take a range of populations with its ear flex
- Really solid on agronomics and diseases
- Average Greensnap risk

STALK STRENGTH	8
ROOT STRENGTH	8
OVERALL DISEASE	8

NEW

84P90

114 DAY

Available as: TRERIB, CONV

- An offensive type product with great heat and drought tolerance
- Solid stalks, roots and Greensnap tolerance
- Tolerates high pH soils well
- Very good silage characteristics

STALK STRENGTH	7
ROOT STRENGTH	7
OVERALL DISEASE	7

PROVEN

85P13

115 DAY

Available as: CONV

- Unique genetic pool to add to the conventional lineup
- Strong data as it came out of research trials
- Widely adapted genetics that also make great silage
- Strong agronomics with good ear flex

STALK STRENGTH	8
ROOT STRENGTH	8
OVERALL DISEASE	7.5

PROVEN

85P58

115 DAY

Available as: SSRIB, VT2PRIB, CONV

- A power-house hybrid for the full season lineup!
- Has nice top end, but really brings up the bottom end on variable soils
- Well adapted and should go on lots of acres in the Midwest
- Big test weights with a fibrous root system

STALK STRENGTH	9
ROOT STRENGTH	8
OVERALL DISEASE	7.5

PROVEN

86P55

116 DAY

Available as: TRERIB

- Massive yields when managed aggressively!
- This hybrid is designed for the detailed grower on highly productive acres
- A full flex ear that does not require high populations
- Closely managed fertility and fungicide usage will bring you big rewards

STALK STRENGTH	7
ROOT STRENGTH	6
OVERALL DISEASE	7

CORN SEED TREATMENTS

ProHarvest goes above and beyond the industry standard on our corn seed to give us the best opportunity for an optimum stand in any conditions. This chart shows the number of different ingredients and Modes of Action for key seedling diseases.

MODES OF ACTION SUMMARY

	Insecticide	Vibrance	Vayantis	Pythium	Rhizoctonia	Fusarium	Phytophthora	Phomopsis
ProHarvest	500 mg rate	YES	YES	3	4	3	2	1
Industry Standard	250 mg rate	NO	NO	2	1	1	1	0

CORN SILAGE INFORMATION

Feeding livestock is important at ProHarvest Seeds, and we are proud to offer silage customers information related to our lineup. Below you will find replicated data on our key commercial lines we have identified to have desirable silage characteristics. The products are sorted by “Milk Per Acre” and then given a ranking for “Milk Per Ton”. Information related to starch, fiber and tonnage is included as well.

				YIELD AT 65% MOIST. (TONS/A)	DRY MATTER (%)	CRUDE PROTEIN (%DM)	ENERGY		FIBER				MILK 2006 30 HR		MILK/ACRE (LBS)
BRAND	PRODUCT	TECHNOLOGY*	RM				STARCH (%DM)	IN-SITU SD - 7HR (%STARCH)	ANDF(%DM)	NDFD30(%NDF)	UNDF240(%DM)	TTNDFD(%NDF)	MILK/TON (LBS)	RANK

*Data represents replicated testing done in 2025 with 3rd party testing from Northern Illinois and Southern Wisconsin

Yield at 65% Moisture	Silage Yield in tons per acre adjusted to 65% moisture.
Dry Matter (%)	The percentage of the freshly chopped forage consisting of Dry Matter (without moisture).
Crude Protein (%DM)	The percentage of forage dry matter consisting of Crude Protein. High values are desired.
Starch (%DM)	The percentage of forage dry matter consisting of Starch. Starch, derived from grain and digestible fiber, is a key energy element. High values are desired.
In-Situ SD - 7hr (%STARCH)	The percentage of total starch that is nutritionally available by digestion after 7 hours. High values are desired.
aNDF (%DM)	Neutral Detergent Fiber measures the fiber content of the forage, expressed as percentage of forage dry matter. Low values are desired.
NDFD30 (%NDF)	Neutral Detergent Fiber Digestibility measures the fiber digestibility of the forage within 30 hours of rumination, expressed as percentage of NDF. High values are desired.
uNDF240 (%DM)	Undigested Neutral Detergent Fiber content remaining after 240 hours expressed as percentage of forage dry matter. Low values are desired.
TTNDFD (%NDF)	Is a measure of the extent and speed of fiber digestion throughout the entire tract of a high-producing dairy cow. High values are desired.

Enlist E3® · XtendFlex® · Conventional SOYBEAN TREATMENTS & PRODUCTS

Every bag of ProHarvest-brand soybeans is selected with you in mind. That's because it is our job to bring you the best products for your farm. Our 2027 soybean lineup is more comprehensive and diverse than ever. You will notice that we have chosen products with strong agronomic traits, pest resistance, disease tolerance, and excellent emergence and standability. Our expertise on specific tillage systems and agronomic practices will enhance product performance.

WIN THE START proTect Soybean Seed Treatment

Robust Fungicide Package

Protect your genetic investment with **proTect DI & Ultra** premium soybean seed treatments, delivering unparalleled protection against the Midwest's top yield-robbing diseases Phytophthora, Pythium, Rhizoctonia, Fusarium, and Phomopsis. With 8 powerful ingredients providing multiple modes of action and a polymer for improved plantability, you can plant with confidence for stronger stands and greater yield potential.

Lumisena™

FUNGICIDE SEED TREATMENT

More Modes Of
Action Against Early
Season Diseases

Control Against Key
Insects & Pests

Strong, Healthy
Plant Stands &
Improved Vigor

- Early soybean planting offers yield benefits, but cold, wet soils heighten vulnerability to pests and disease, slow seedling growth, and extend feeding periods for insects.

(in proTect D Ultra only)

- is a biological seed treatment for growers to get a head start against a variety of fungal and bacterial diseases including suppression of Sudden Death and White Mold

- is a unique blend of essential macro and micro nutrients combined with proprietary plant extracts to promote germination, seedling vigor and early plant growth

- proTect D Ultra enhances early planting protection by adding in Victrato, offering consistent defense against SDS, SCN, and Red Crown Rot – without early-season plant stress

Modes of Action Summary

ENLIST E3[®] SOYBEANS

ENLIST E3[®]

Enlist E3[®] soybeans offer growers herbicide tolerance to Glyphosate, Glufosinate and 2,4-D, and limited set back restrictions. Enlist E3[®] soybeans will allow unprecedented herbicide options pairing up elite genetics with either the pre-packaged Enlist Duo[®] or Enlist One[®] which can be paired with other approved herbicides.

27E77

2.7 RM

Trait: Enlist E3[®]

- A Peking line that packs a punch!
- Performance across the Midwest, but keep in zone and North
- Very strong data compared to key checks
- Comprehensive disease package

NEW

25E35

2.7 RM

Trait: Enlist E3[®]

- A dominant Peking line in this RM!
- A strong medium-tall, bushy plant type
- Very strong tolerance to SDS
- Excels in high and low yield environments both

PROVEN

29E71

2.9 RM

Trait: Enlist E3[®]

- Does a great job from East to West!
- Cuts down the competition for a wide swath of RM
- A Peking line that is strong against SWM and SDS both!
- A great looking plant type come harvest

NEW

32E79

3.2 RM

Trait: Enlist E3[®]

- This Peking brings some diversity into the early 3 RM
- Well adapted to all soils and yield levels
- Nice height with a solid plant style
- Strong disease package including SDS

NEW

ENLIST E3® SOYBEANS

37E72

3.7 RM
Trait: Enlist E3®

- Brings Peking SCN resistance to a late RM!
- Maintains great plant health throughout the season
- Well-adapted to the Central and Southern Corn Belt
- Tolerant against Green Stem issues come harvest time

NOTES

27F66

2.7 RM

Trait: XtendFlex®

- Test leading performance across the Midwest
- Offers a double stack of PRR genes
- Nice plant style with height and width both
- Offers a very complete disease package

PROVEN

28F70

2.8 RM

Trait: XtendFlex®

- A Peking option for the XtendFlex® market!
- Watch placement on fields with high SWM pressure
- Has some width and branching to the plant type
- Also has tolerance to Sulfonylurea ready® chemistry

NEW

30F73

3.0 RM

Trait: XtendFlex®

- Lights-out performance in its data set!
- A great wet feet product
- Great emergence with outstanding standability
- A well-adapted product for the Corn Belt

NEW

34F74

3.4 RM

Trait: XtendFlex®

- A chart topper for Group 3 RM!
- A nice upgrade for standability in this maturity
- Has a clean look to it come harvest time
- Very good in no-till and carries stacked PRR genes

NEW

36F58

3.6 RM

Trait: XtendFlex®

- A highly touted line in the industry!
- Lots of excitement around this variety
- Looks amazing in the field and has the yield too
- Truly a line with no holes in it!

Seed containing a patented trait can only be used to plant a single commercial crop. It is unlawful to save and replant Roundup Ready 2 Yield® soybeans, Roundup Ready 2 Xtend® soybeans, and XtendFlex® soybeans. Additional information and limitations on the use of these products are provided in the Technology Stewardship Agreement and the Bayer Technology Use Guide: tug.bayer.com. U.S. patents for Bayer technologies can be found at the following webpage: cs.bayerpatents.bayer.com

Proven Performance

Manage Tough-to-Control Weeds

XtendFlex® trait technology provides farmers with flexibility to meet the needs of their operation through customizable weed management strategies.

*5,070 head-to-head comparisons in Bayer's 2024 breeding and market development germplasm trials v. key commercial E3® checks in major soybean growing regions +/- 0.2 RM. 61% win rate.

No dicamba may be used in-crop with seed with Roundup Ready® Xtend Technology, unless and until approved or specifically permitted, and no dicamba formulations are currently registered for such use in the 2025 season. Please follow www.roundupreadyxtend.com/pages/xtendimax-updates.aspx for status updates. Dicamba may harm crops that are not tolerant to dicamba.

CONVENTIONAL PRODUCTS

Conventional

CONVENTIONAL

Although the demand for conventional soybeans varies from year to year, there is a consistent request for this segment of the soybean market.

Unlike traited soybeans, which are largely dominated by large corporations, the introduction of new conventional soybean genetics comes from companies large and small.

COVER CROPS

As growers, we know we cannot control weather or prices. However, we can be proactive with a cover crop plan. Over time, a well-developed strategy can erase the stubborn yield limitations of our land. In combination with new seed genetics and technology innovations, cover crop usage will begin to break through that yield barrier.

Scan this code to view additional Cover Crop information

COVER CROPS

QUICK COVER BLEND

Radish, Oats

- Easy, effective blend for low management
- Establishes quickly to minimize fall erosion
- Winter-kills easily
- Scavenges nutrients well

BONUS BLEND

Winter Rye, Radish, Rapeseed, Barley

- Excellent fall weed suppression
- More biodiversity to stimulate microbes
- Long establishment window for a fall blend
- Improves soil structure and increases organic matter

LAND & LIVESTOCK BLEND

Winter Rye, Radish

- Easy to manage for being an overwintering blend
- Very good fall and spring weed suppression
- Builds soil below ground and protects it above
- Low risk of establishment comparatively

SECURE BLEND

Radish, Annual Ryegrass

- Excellent in decreasing soil compaction
- Improves soil structure and permeability
- Scavenges nitrogen both fall and spring
- Includes a winter-hardy annual ryegrass variety

N-FIX BLEND

Radish, Fixation Clover, Crimson Clover

- Nitrogen fixing and scavenging at its best
- Excellent after wheat, corn silage or seed corn
- Improves soil tilth
- Plant timely to take advantage of nitrogen production

AWAKEN PLUS BLEND

Radish, Rapeseed, Fixation Clover, Crimson Clover, Oats, Buckwheat, Cowpeas, Pearl Millet, Prussic Free Sorghum x Sudangrass

- Excellent summer mix with a lot of biodiversity
- Establishes quickly to minimize fall erosion
- Winter-kills easily
- Excellent summer grazing mix

A decorative background featuring a series of thin, horizontal, light gray lines. Overlaid on these lines are two large, light gray, curved shapes that resemble stylized waves or abstract letterforms, positioned on the left and right sides of the page.

LEGAL

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, **including applicable refuge requirements for insect resistance management**, for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation and agreement to comply with the most recent stewardship requirements.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all applicable regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

Refuge seed may not always contain the DroughtGard® trait. **IMPORTANT IRM INFORMATION:** Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Plants that are not tolerant to glyphosate may be damaged or killed if exposed to those herbicides. Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG. Herculex® is a registered trademark of Dow AgroSciences LLC. Agrisure Viptera® is a registered trademark of a Syngenta group company. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. Acceleron®, DroughtGard®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready®, SmartStax®, Trecepta®, VT Double PRO®, and VT4PRO™ are trademarks of Bayer Group.

Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Due to the unique cropping practices do not plant Roundup Ready® Alfalfa in Imperial County, California, pending import approvals and until Forage Genetics International, LLC (FGI) grants express permission for such planting.

Forage Genetics International, LLC ("FGI") is a member of Excellence Through Stewardship® (ETS). FGI products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with FGI's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Roundup Ready® Alfalfa has pending import approvals. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotradestatus.com/> for any updated information on import country approvals. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship. **ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.** Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Glyphosate will kill crops that are not tolerant to glyphosate. Roundup Ready® and Roundup® are registered trademarks of Bayer Group, used under license by Forage Genetics International, LLC.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Roundup Ready® is a registered trademark of Bayer Group, used under license by Forage Genetics International, LLC. UltraCut® and HarvXtra® are registered trademarks of Forage Genetics International, LLC. HarvXtra® Alfalfa with Roundup Ready® Technology is enabled with Technology from The Samuel Roberts Noble Foundation, Inc.

Agrisure®, Agrisure Viptera®, Artesian®, Agrisure® Above, Agrisure® Total, Duracade®, DuracadeViptera™, DuracadeViptera™Z3, Durastak™, DurastakViptera™, E-Z Refuge®, Saltro®, Viptera® and Viptera™Z3, are trademarks of a Syngenta Group Company. Trademarks are the property of their respective owners. More information about Syngenta corn products are available at <http://www.biotradestatus.com>.

Important: Always read and follow label instructions. Some products may not be registered for sale or use in all states or counties. Please check with your local extension service to ensure registration status.

Syngenta supports a FIFRA Section 2(ee) recommendation for Red Crown Rot in soybeans. Please see the Section 2(ee) recommendation to confirm that the recommendation is applicable in your state. The Section 2(ee) recommendation for Saltro should be in the possession of the user at the time of application.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post-emergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF.

Corn trait technology incorporated into these seeds is commercialized under license from Syngenta Seeds, LLC. Herculex® Technology incorporated into these seeds is commercialized under license from Corteva Agriscience LLC. HERCULEX® and the HERCULEX Shield are trademarks of Corteva Agriscience LLC.

YieldGard VT Pro™ is a trademark used under license from the Bayer Group.

© 2026 Syngenta. **Important: Always read and follow label and bag tag instructions; only those products labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium-based herbicides.**

Seeds containing the PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, Enlist® Corn - REFUGE and Enlist E3® traits are protected under one or more U.S. patents which can be found at www.traitstewardship.com. The purchase of this traited seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements. To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, Enlist Corn - REFUGE and Enlist E3 seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3 soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at www.traitstewardship.com.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com. Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Properly managing trait technology is key to preserving it as a long term crop protection tool. **Growers who fail to comply with IRM requirements risk losing access to this product.** To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options.

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www.traitstewardship.com to download the latest Corteva Agriscience Corn Product Use Guide.

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. **ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE AND COUNTY OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CROPS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS.** Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com.

The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C.™ *Trademarks of Corteva Agriscience and its affiliated companies.

POWERCORE® multi-event technology developed by Corteva Agriscience LLC and Monsanto. LibertyLink® and the Water Droplet Design are registered trademarks of BASF. PowerCore® and Roundup Ready® are registered trademarks of Bayer Group. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.t. products may not yet be registered in all states. Check with your seed representative for the registration status in your state.™ *Trademarks of Corteva Agriscience and its affiliated companies.

Varieties with BOLT® technology provide excellent plant-back flexibility for soybeans following application of sulfonylurea (SU) herbicides such as DuPont™ LeadOff® or DuPont™ Basis® Blend as a component of a burndown program or for double-crop soybeans following SU herbicides such as DuPont™ Finesse® applied to wheat the previous fall.

THE PROHARVEST REACH

Make Every Harvest a ProHarvest.

Our Vision

To be the seed company of choice in the Midwest, providing exceptional products to our customers that are widely respected and growing while operating ethically and responsibly.

Our Mission

ProHarvest Seeds is committed to maximizing the goals of our customers by providing optimized seed selections with elite genetics, traits, and treatments. We are focused on partnering with our growers through their successful harvest by providing excellent service, thorough product research, and a personal touch.

Core Values

- We are a company people are proud to do business with because of our integrity, honesty, and strong values.
- We are easy to do business with—no complicated pricing or sales programs, and easy access to appropriate personnel for agronomy, shipping, invoicing, and especially the owners.
- We will only sell products that meet our high standards, be it performance or quality, regardless of how it may impact the company's bottom line.
- We operate by the Golden Rule which says, *"Do unto others as you would have done unto you."*
